

GOD BLESS THE CODERS

GBTC

and God bless the Claude

May your syntax be clean
and your logic be sound.

May the bugs be external
and easily found.

May your coffee be hot
and your compilers be fast.

May the legacy codebase
stay dead in the past.

Through git push and git commit,
in production we trust,

For without your sweet code,
the world turns to rust.

Amen — and close the bracket.

TAKE ONE. GIVE ONE AWAY.
